PROFILE

A Full-stack Software Developer with a strong foundation in both frontend and backend technologies, and a passion for building responsive, user-friendly websites and mobile apps. Proficient in Next.js, React, TypeScript and React Native, I have developed more than 10 projects across a range of tech stacks and launched my own app, StillGood, on the Google Play Store. Always eager to expand my technical expertise, I will be pursuing a degree in Software Engineering at SIT after completing my National Service.

EDUCATION

Singapore Institute of Technology

2028 – 2031 (Incoming)

Bachelor of Engineering (Honours) in Software Engineering

Singapore Polytechnic

2023 – 2026

Diploma in Information Technology (S69)

Certificate in Design & Innovation

Compassvale Secondary School

2018 – 2022

GCE N(A) Level and GCE O Level Certificates

EXPERIENCES

StillGood

Apr 2026 – Present

Founder & Developer

Designed and developed StillGood, a food waste app, on my own, including the React Native mobile app, a Fastify backend with a Supabase database and the website. Integrated Google's Gemini AI to scan groceries and suggest recipes, and PostHog to understand how users use the app. Launched on the Google Play Store on 26 August 2026.

Freelance

Feb 2026 – May 2026

Software Developer

Developed websites for paying clients, including the Calibrium online watch store, where I added registration and login, a profile page, checkout with payment, order history, favourites and order confirmation emails.

Amber Creative Pte Ltd

Apr 2025 – Feb 2026

Full-stack Software Developer Intern

Developed and contributed to multiple client projects such as ITE Work-Study Diploma (WSDip), KiasuParents, Glovida-RX Pharmacy and the Institute for Adult Learning (IAL), using Next.js, TypeScript, C# and CMSs such as Kentico, Strapi and StoryBlok.
